Literacy updates:

We have just begun our final unit for the year...Physical Science: Matter and Energy, Forces, Gravity and a *sampling* of engineering.

** That said, I am in NEED of as many paper rolls that you can collect. Long Tubes are especially scarce. So, if you are wrapping any birthday gifts or getting rid of some excess wrap, send the rolls my way!
THANKS!

Math updates:

We have been building our addition and subtraction strategies as we learn how to work with double digit numbers. Ask your child how they might solve a double digit problem adding or subtracting while using a number line, base tens, number trails or even the tradition algorithm. (We encourage real understanding of numbers before expecting them to use the algorithm)
We begin double digit subtraction **with regrouping next week!

General information:

Hippie day is Next Friday!

**Thanks for all your kind words, treats and a wonderful lunch this week in honor of teacher appreciation week. So thoughtful of our PTO and families!
